Summary

As a front-end software developer with a passion for clean, efficient code and user-friendly design, I bring a wealth of experience and skills to every project I work on. With a solid foundation in HTML, CSS, JavaScript, and related frameworks such as React and Next.js, I am dedicated to staying up-to-date with the latest trends and best practices.

I pride myself on my ability to communicate effectively with technical and non-technical team members, ensuring everyone is on the same page and working towards a common goal. I am always focused on delivering high-quality code that meets or exceeds expectations and meeting deadlines.

Skills

Technical Skills:

React.js · Next.js · Git · Html5 · CSS3 · tailwindCSS · MongoDB · AWS · REST APIs · javaScript · jira & confluence · styled components

Soft skills:

Effective communication · Attention to detail · Meeting deadlines · Continuous improvement · Growth mindset · Creativity · Debugging

Experience

Altec Construction
Contract Frontend Engineer

Remote
2023 - 2023

- Responsible for developing the frontend components using React, Redux, and Redux Toolkit.
- Implementing the state management architecture with Redux, ensuring efficient and scalable data flow.
- Collaborating with the designing team to create intuitive and visually appealing user interfaces for the web application.
- Designing interactive components for the to-do list, incorporating drag-and-drop functionality

Learn Now Africa
Frontend Developer - Intern

Remote
2022 - 2023

- Developed and maintained responsive websites using Next.js, tailwind, typescript, ensuring cross-browser compatibility and optimal user experience.
- Collaborated with designers and backend developers to implement UI/UX designs and integrate frontend components with backend systems.
- Conducted thorough testing and debugging to identify and resolve issues, ensuring the quality and performance of web applications.
- Actively participated in code reviews and team discussions, contributing to a collaborative and innovative development environment.

Personal Project

Instant-C (e-commerce site)

* Developing a feature-rich e-commerce platform from scratch using the MERN stack, ensuring seamless integration of MongoDB, Express.js, React.js, and Node.js components.
* Leveraged Google Cloud services and AWS to implement efficient data storage, server deployment, and cloud computing, resulting in a high-performance application.
